**LEVEL** is a dance film that represents the origin of social construction, but at the same time how **deconstruction** plays a part in knowledge growth.

Seven characters in earth matisse colorus play intimately with themselves and the one next to them, finding in their **language spectrum** others that exists in the same time/frame/space. The layered story gradually developes; into finding a common structure in which in **reverse form**, alluding the palindrome word as title, deconstructs what is known.
